SUMMARY

B.Tech Computer Science (AI & ML) student at Presidency University, Bengaluru (graduating 2028), building web applications and machine learning models. Led a 6-member team to a Smart India Hackathon 2026 submission for Coal India Limited and took part in the Google Student Ambassador and Adobe University hackathons. Seeking a software engineering or AI/ML internship.

TECHNICAL SKILLS

- **Languages:** Python, C++, JavaScript (ES6+), SQL
- **AI/ML:** Logistic Regression, text classification, neural network fundamentals
- **Generative AI:** Google Gemini, prompt engineering, RAG (design), natural-language query pipelines
- **Web:** React, HTML5, CSS3, Tailwind CSS, Vite, REST APIs
- **Databases:** MySQL, schema design and normalization, Python–database integration
- **Core CS:** Data Structures and Algorithms, Object-Oriented Programming, DBMS
- **Tools & Platforms:** Git, GitHub, GitHub Pages, VS Code, Linux shell
- **Familiar with:** Node.js, Express.js, Docker, AWS, FastAPI

PROJECTS

ANUPALAN – AI Compliance and Governance Command Centre | Smart India Hackathon 2026 (SIH26024) | Team Leader, Team NeuraForge (6 members)

Design stack: RAG (pgvector, sentence-transformers), XGBoost, YOLOv8, React Native, FastAPI, PostgreSQL

- Led a 6-member team to design an AI compliance-monitoring system for Coal India Limited (310 mines, 14 subsidiaries); selected in the internal hackathon, submitted on the SIH 2026 portal and awarded a Certificate of Appreciation by Presidency University.
- Designed a Retrieval-Augmented Generation (RAG) engine that converts mining regulations into tracked obligations with owners, deadlines and evidence types.
- Planned an XGBoost risk model and YOLOv8 image triage to flag violations and filter false field reports; specified an offline-first React Native app with a FastAPI and PostgreSQL backend and tamper-evident, geotagged evidence logs.

Personal Portfolio Website | React, Vite, Tailwind CSS, GitHub Pages

- Built a responsive, multi-section portfolio (projects, skills, education, certificates, downloadable resume) with React and Tailwind CSS.
- Added a working contact form through the Web3Forms API and deployed the site on GitHub Pages.

Spam Email Detection | Python, Logistic Regression | Machine Learning Mini Project

- Built a logistic regression classifier in Python to label emails as spam or not spam, reaching 94% accuracy on a college-provided dataset.

EDUCATION

Presidency University, Bengaluru | B.Tech, Computer Science and Engineering (AI & ML) | 2024 – Expected 2028

- 4th semester completed · CGPA 7.11/10 · Specialization in Artificial Intelligence and Machine Learning

Class XII, Bihar School Examination Board (BSEB): 83% | **Class X**, Central Board of Secondary Education (CBSE): 73%

HACKATHONS

Fund My Crazy: Build Night Edition | Google Student Ambassador Program | Aug 2026

- Built solutions with Google Gemini to reimagine everyday urban living, with visual concepts created using Nano Banana.

Adobe University Hackathon | Adobe · Unstop | Aug 2026

- Selected to represent Presidency University in Adobe's competitive university hackathon.

CERTIFICATIONS

- **Introduction to Artificial Intelligence** – Infosys Springboard, Oct 2026
- **Mastering Databases with Python** – GUVI | HCL, Sep 2026
- **GenAI Job Simulation** – BCG X (Forage), Dec 2025
